

Programming Assignment 2

Trevor Zachman-Brockmeyer

February 22, 2021

1 How to Invoke Program

- Compile: `make`
- Test: `make test`
- Remove Compiled Java: `make clean`
- Remove Generated Testing files: `make cleantest`

2 Assumptions/Miscellaneous

- Although `eof.txt` isn't used by my tests, I test a string being terminated by an EOF character in my `testInvalidStringLiterals()` function in `P2.java`.
- When running the Test command above, if the diff calls return no differences, this signifies the parser is working as intended.
